

PACKAGING CONCEPT

For transportation and storage of mounting systems and their elements, LLC "Solar Steelconstruction" uses packaging that ensures the safety of goods from damage and deterioration while maintaining the goods in a ready-for-sale condition.

The packaging used includes:

- wooden boxes with phytocontrol: 690x1300x540 mm; 1000x1200x1000 mm;
- wooden beams with phytocontrol 70x70 mm;
- wooden pallets with phytocontrol 1000x1200x150 mm;
- cardboard boxes 135x230x155 mm; 280x255x185 mm; 190x445x265 mm;
- coated steel band 19x0,8 mm;
- protective plastic rectangular corners;
- stretch wrap.

The packaging used by Solar Steelconstruction meets the requirements of the International Standards for Phytosanitary Measures No. 15 (ISPM 15).

The markings on each packaging unit should include the company logo, item name, drawing number, and quantity. The marking language is agreed with the Customer. To label the packaging for the goods to be exported, English language is commonly applied.

The packaging is not returnable and must be recycled.

The packaging of each shipment of goods is developed by the engineer and agreed with the Customer, depending on the type of transport used for the delivery of goods, the scheme of loading into the transport, and the Customer's requirements for unloading.

The maximum weight of a packaging unit, taking into account the weight of the goods and packaging, does not exceed 5 tons.
