

ENVIRONMENTAL POLICY

SOLAR STALKONSTRUKCJA Spółka z ograniczoną odpowiedzialnością

The activity of SOLAR STALKONSTRUKCJA Spółka z ograniczoną odpowiedzialnością is focused on the installation of solar power plant facilities.

The company considers environmental protection, rational use of natural resources, ensuring environmental safety of production activities to be a strategically important element of its activity.

Our commitments:

Commitment to environmental protection

The company undertakes to protect the environment from damage and degradation arising from the company's activities, to prevent negative impact on the environment by preventing pollution through the implementation, maintenance and continuous improvement of the environmental management system in accordance with the requirements of the international standard ISO 14001:2015, the scope of which extends to the installation of solar power plant facilities.

These obligations relate to the mitigation of the consequences of the company's activities, the preservation of biological diversity and ecosystems in the course of the company's activities.

Ensuring a balance between the environment, society and production activities

We see this balance as an important condition for meeting the needs of people living without compromising the ability of future generations to meet their needs.

Enforcement of legislation

We comply with the requirements of the environmental legislation of Poland and the European Union, norms and rules of environmental safety and the safe implementation of production, economic, management and other types of activities to support social expectations regarding the preservation of the ecosystem.

Responsibility

- We take our obligations to society seriously;
- We do our best to protect the environment;
- We strive to meet the requirements of ISO 14001:2015 to provide all stakeholders with confidence that the company has an effective environmental management system in place.

Our tasks:

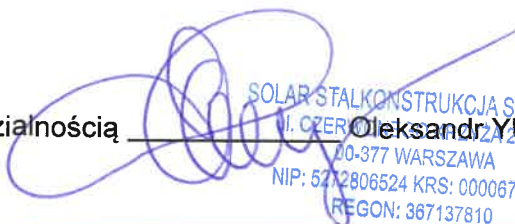

- Use and implementation of modern technologies in order to prevent or minimize adverse effects on the environment;
- Involvement of all personnel in the work of ensuring environmental protection;
- Establishing control over all environmental aspects through the use of technical means and organizational measures;
- Establishing and assessing all risks and opportunities related to environmental aspects;
- Acceptance and fulfillment of obligations related to environmental aspects;
- Use of the intellectual potential of the staff, knowledge management;
- Rational use of resources (raw materials, materials and energy);
- Interaction and cooperation with state authorities, mass media, and the public.

Achievement of the set tasks will be achieved due to:

- Implementation, maintenance of functioning and continuous improvement of the effectiveness of the environmental management system in accordance with the requirements of ISO 14001:2015;
- Constantly informing company personnel and external stakeholders about the functioning of the environmental management system;
- Continuous analysis of existing and implementation of new methods of work in the field of ecology;
- Continuous analysis of the effects of environmental aspects and improvement of the environmental management system.

Top management of SOLAR STALKONSTRUKCJA Spółka z ograniczoną odpowiedzialnością is aware of the responsibility for the impact of the company's activities on the environment and undertakes to ensure the implementation of all measures aimed at the implementation of this Policy, as well as to constantly improve the environmental management system.
